

Wetland Scientist/Permitting Specialists

Normandeau Associates, Inc. seeks all levels of Wetland Scientist/Permitting Specialists for work across northern New England. We currently have offices in Bedford (NH), Falmouth (ME) and Westmoreland (NH) which is on the NH/VT Border.

Primary responsibilities would include performing wetland delineations, preparing permit applications (local, state, and federal), conducting wildlife and botanical surveys, rare species investigations, and other field-related studies. Depending on the level of position, additional responsibilities may include: client management, interaction with State and Federal regulatory and resource agencies, data analysis/evaluation, report preparation, preparation for and presentation at public meetings, and business development activities, including the preparation of proposals. Travel is required.

Applicants should have a minimum of a Bachelor's degree in wetland science, botany, soil science, wildlife biology, environmental science, ecology or a related field. Advanced degrees preferred for higher level positions, along with NH wetland scientist certification and/or certification as a Professional Wetland Scientist (PWS) through the Society of Wetland Scientists. Prior experience conducting wetlands delineation, permitting, botanical and endangered plant surveys in the northeast US is required. Strong writing and verbal communication skills are important, along with a high degree of comfort with computers and technology, a willingness to learn new skills, and flexibility in work assignments. Candidates must be able to work in the United States without company sponsorship.

Please send a letter of interest, resume, and writing sample to:
